This toolkit is designed to support all Chapters – new and old – with resources and suggestions to help you recruit students, manage and sustain your Chapter, and spread the word about the IHI Open School.

All these resources – and some additional tools – are in the “Chapter Leader Resources” section of the IHI Open School website. Still can’t find what you’re looking for? Let us know at openschool@ihi.org. We are committed to supporting the important work you’re doing!

Welcome to the IHI Open School Chapter Network

Dear Chapter Leader,

Congratulations on your new role and welcome to a community of Chapter Leaders from more than 910 IHI Open School Chapters worldwide. We are thrilled to have your leadership and dedication to improve health and health care for all. This movement truly begins with you – with your commitment to change the way health professionals work, interact with one another, and deliver care. By providing resources and opportunities often otherwise unavailable at your institution, you are equipping your members to be agents of change. Health care systems aren’t going to fix themselves—to quote Paul Batalden, MD, it is going to take the “the combined and unceasing efforts of everyone.” While your colleagues may care about patient safety and quality improvement, it is through your leadership that they will be able to address the issues and challenges they will face in their future careers.

In addition to your role as a Chapter Leader, you are an integral member of the Institute for Healthcare Improvement community. You amplify our reach and capacity for change, help us lead locally, and serve as an icon for improvement success. We want to thank you for your involvement by showcasing your work, supporting your continued engagement and professional growth, and promoting the value of your leadership to health care institutions worldwide.

This Chapter toolkit is essential for all Chapter Leaders and contains information to help you start building a successful, vibrant Chapter. In these pages, we share advice and best practices from other successful Chapters. We encourage you to look for opportunities to build on other Chapters’ successes by developing new ways to improve yourself, your school, and your health system. Keep in mind that this is just one of the resources available to Chapter Leaders. We look forward to sharing more great resources with you through:

- The IHI Open School website, courses, and weekly newsletter
- The annual IHI Open School Congress
- Programming at the annual IHI National and International Forums
- Monthly topic-specific Global Chapter Network calls
- The Annual IHI Open School Leadership Academy

Don’t forget to share your progress, your experiences, and any potential challenges with the IHI Open School team. We’re here for you. We wish you and your Chapter all the best and look forward to your successes and accomplishments.

Sincerely,

Jessica Perlo, M.P.H.
Network Director, IHI Open School
openschool@ihi.org
Open School Overview

The Institute for Healthcare Improvement (IHI) is a reliable source of energy, knowledge, and support for a never-ending campaign to improve health care worldwide. We aim to improve the lives of patients, the health of communities, and the joy of the health care workforce. One of the many programs within IHI, the IHI Open School is an initiative to advance health care improvement and patient safety competencies in the next generation of health professionals worldwide. It’s an important goal — one not currently fulfilled by the curriculum at most health professions schools.

IHI Open School Mission

We aim to advance the health improvement and patient safety competencies in the current and next generation of health professionals worldwide.

Launched in September 2008, the IHI Open School encourages students of medicine, nursing, dentistry, pharmacy, health administration, public health, and other allied health professions to participate on a voluntary basis at no charge. The online educational community features extensive content and resources for participants, as well as a network of local Chapters that organize events and activities on campuses across the world.

Here’s what the IHI Open School can offer you:

- **Online courses written by world-renowned faculty.** Take our online courses in quality improvement, patient safety, leadership, patient- and family-centered care, population health, and managing health care operations, which are free to students, residents, and faculty. Boost your skills anywhere you have Internet access.

- **A network of students and educators like you.** Connect with students and faculty from other professions, states, and countries through our network of Chapters.

- **The IHI Open School Basic Certificate in Quality & Safety.** Complete a set of 13 online courses – free to students, residents, and faculty – and earn a certificate that shows employers you’re serious about improving care.

- **Case studies, exercises, videos, featured articles.** Discover a bounty of online resources available on our (mobile-friendly!) website.

- **Project-based learning opportunities.** Complete the IHI Open School Quality Improvement Practicum by conducting a quality improvement project at your local institution or build leadership and community organizing skills to improve the health of your community through the Leadership and Organizing for Change course.

Introduction to IHI Open School Chapters

An IHI Open School Chapter is a face-to-face, interprofessional group at your institution. Each Chapter is unique. It brings students from different health professions together through a shared interest in learning about quality improvement and patient safety. IHI Open School Chapters exist
on university campuses or in health care organizations, creating a forum for like-minded students and residents to interact and help each other gain skills to improve care. The IHI Open School provides Chapters with opportunities to learn, network with peers, connect with engaged and supportive faculty, and accomplish scholarly activities such as publishing and presenting work.

Take our free overview course, *OS 101: Introduction to the IHI Open School: Join the Movement to Improve Health & Health Care*, to learn more about how to get the most out of the Open School’s online education, interprofessional Chapter groups, and improvement project mentorship. This course is available in English, Spanish, and Portuguese.

**Chapter Goals and Objectives**

- Generate local awareness of – and excitement for – quality improvement, patient safety, and leadership among the next generation of health care professionals.
- Advance leadership, quality improvement and patient safety competencies locally.

**What do IHI Open School Chapters do?**

Here are some examples of what IHI Open School Chapters do:

- Take IHI Open School courses to strengthen their quality and safety skills and knowledge.
- Participate in educational reform to incorporate quality and safety into their formal curriculum.
- Host events for peers or colleagues interested in quality improvement or patient safety at their organization or with other Chapters in their region.
- Participate in project-based learning opportunities through the Open School and conduct quality improvement and organizing projects.
- Facilitate activities, discussions, and exercises available on the IHI Open School website.

**Who is Involved in IHI Open School Chapters?**

Chapters are based on university campuses, hospitals, health systems, and other health care organizations and should be interprofessional in nature – including members of nursing, medicine, health administration, pharmacy, engineering, business, and other health professions. Some health care delivery sites have started Chapters to provide an informal opportunity to train staff, engage new professionals in improvement, and train students rotating through their organizations. (In this structure, we encourage you to identify local students to participate in the Chapter.)

**Chapter Leader Role and Responsibilities**

Anyone willing to help form and lead the Chapter can be the Chapter Leader. Students or residents usually lead Chapters, although faculty and deans can also serve in the role. Chapter Leaders:
• Recruit students and faculty to your leadership team.
• Facilitate learning and networking opportunities.
• Organize a diverse set of projects, events, and activities that provide meaningful opportunities to build and practice skills in leadership and quality improvement.
• Connect with other Chapter Leaders, locally and internationally, to share ideas and best practices.
• Advocate for patient safety and quality topics to be included in their formal curriculum.

Faculty Advisor Roles and Responsibilities

Faculty Advisors are faculty members, attendings, professors, deans, employers, or anyone willing to advise and support the Chapter. If possible, the Faculty Advisor should have a permanent position at the organization to promote continuity and sustainability within the Chapter. Faculty Advisors:

• Advocate for the Chapter as an organization officially recognized by the institution’s administration. To support this aim, Faculty Advisors offer advice on ways to obtain funding for Chapter activities.
• Participate in Chapter meetings — for example, facilitate discussions about videos or case studies — and assist with planning activities as needed.
• Help the Chapter Leader ensure continuity of the Chapter over time (i.e., transfer of Chapter Leadership from year to year).
• Identify local opportunities for students to work on patient safety and quality improvement projects and initiatives.

What will I get if I start or join an IHI Open School Chapter?

If you start or join an existing Chapter, here are a few opportunities you can look forward to:

• Boosting your skills in patient safety and quality improvement in health care within an interdisciplinary setting.
• Putting your knowledge of patient safety and quality improvement to work in local health care organizations.
• Publishing work on IHI’s website and potentially in peer-reviewed journals.
• Being among the first to hear about new courses and content from the IHI Open School.
• Networking and sharing ideas with like-minded students, faculty, and health care professionals across our global community.
• Collaborating on IHI Open School resources — including courses and case studies — with like-minded peers and colleagues.
Starting a Chapter

There are several things to do when starting a new IHI Open School Chapter at your school or institution. Some suggested best practices are listed below. Please note that these are merely suggestions and not requirements to becoming an IHI Open School Chapter.

Determine Your Chapter Leadership

Most Chapters start with a small but dedicated group of leaders. To find leaders, start with your own friends and colleagues and then branch out to build your base. Find others (including faculty) at your institution who are interested in health improvement and patient safety in some capacity. Some Chapters hand-select highly involved and enthusiastic members to lead the group and others welcome nominations from members, create applications, and/or conduct a formal election process. Refer to the Sustainability section on page 19 to learn how to create a succession plan for your Chapter to guarantee sustainability.

It is important to define the leadership structure for your Chapter to ensure sustainability from year to year. Be strategic about this, clearly define the specifics of each role, and come to consensus as a team. A strong leadership structure will be reflective and supportive of your Chapter’s goals and streams of work. Host a discussion about the structure of your Chapter and review the Chapter Leadership Structure section on page 9 for more information on leadership structures.

Identify a Faculty Advisor

Faculty Advisor are integral parts of a Chapter. Faculty Advisors can help identify new members, help connect Chapter events to institutional needs or priorities, connect Chapter members with local or institutional opportunities, and offer career and academic advice. They also provide continuity within your Chapter from year to year, which is essential for Chapter sustainability.

Any member of the faculty, staff, or administration at your school can serve as a Faculty Advisor. Consider the following recruitment strategies during your search:

- Approach faculty or team leaders who demonstrate an interest or teach courses on topics that align with the goals of your Chapter.
- Reach out to attendees at health care-related events.
- Market your Chapter on a webpage, a bulletin space, or via an email blast to the student body or colleagues.

Once you have identified a potential Faculty Advisor, set up a meeting with them to discuss the mission, purpose, and goals for your Chapter. It is important to be prepared for this discussion and set clear roles and expectations from the start. (See the Faculty Advisor roles and responsibilities on page 6 to learn more.)

Register Your Chapter with the IHI Open School

To be recognized as an IHI Open School Chapter, you must complete the Chapter Enrollment Form. In this form you'll share why you are starting a Chapter, the disciplines represented in your Chapter, and the contact information for the primary and secondary contacts for your Chapter (which can be Chapter Leaders or Faculty Advisors). Once you have submitted your enrollment form, you will receive:
- A welcome email from us confirming your registration as an IHI Open School Chapter and the announcement of your Chapter in our newsletter.

- Inclusion on our online Chapter Map, through which others can reach out to connect and get involved with your Chapter.

- Access to our Chapter Leader and/or Faculty listservs so that you will be able to communicate with the rest of the IHI Open School community members.

**Register Your Chapter with Your School or Institution**

Most schools require student organizations to register with an office that governs student groups on campus (i.e. Office of Student Activities, administration, or Student Government). At a hospital or organization, finding a way to officially “register” may also give you more credibility as you recruit others to join. Although this is not required by the IHI Open School, we highly recommend it, as we find that registered Chapters have better support and recognition from their institutions, including increased opportunities for securing funding.

**Develop Chapter Mission and Goals**

As you establish your Chapter, it is important to determine your Chapter’s priorities. You’ll need to decide why patient safety, quality improvement, and the health of communities are important to you and your Chapter, and how you will contribute to the cause.

We recommend drafting short- and long-term goals and assigning one team member the responsibility of tracking progress. Think back to what you’ve learned about improvement. Good aims are specific, measurable, achievable, connected to the IHI Open School mission, and set up to help you achieve other goals in the future. Use the sample charter located in the Chapter Resource Library section of our website to help you reflect on the unique aspects of your Chapter and to meet school requirements, if any. Remember that these are preliminary goals that can and should change as your Chapter expands!

**Recruit New Members**

Chapters with committed members are more likely to be successful — and the more members your Chapter has, the more you will be able to accomplish. Spreading the word about your new IHI Open School Chapter is the first step to recruiting new members. Turn to the Recruitment section on page 11 to find ideas and tips for recruiting new members.

**Host an Introductory Meeting**

Your introductory meeting sets the stage for a successful Chapter. It is the ideal occasion to introduce your fellow students, residents, or colleagues to the “quality gap” — the gap between ideal care and the care that people receive. Use this meeting to rally support for your cause and publicize your Chapter to the community at-large.
Articulate your Chapter's vision and purpose clearly and offer a preview of the work you’ll be doing over the year to encourage attendance at future meetings and events. The goal of creating a presence for your Chapter is to build membership, so remember to collect contact information and provide timely, friendly follow-up. Look for extra tips and resources in the Planning and Hosting Events section on page 15.

Chapter Leadership Structure

Chapters choose to set up their leadership structure in a variety of ways, including board, dual, flat, and multi-campus leadership structures. Some are more appropriate to implement when you first get started, while other structures will help maintain sustainability once you’ve established yourself. Your leadership structure may change over time, and that’s okay. Just be sure to continue to use one that will help support your success clearly mapping out defined goals and roles.

Additionally, be sure to set-up a structure that shows you value collaboration and don’t be shy about asking for feedback. Soliciting feedback from fellow Chapter Leaders and members helps them feel valued and personally invested. Integrating efforts to improve your own Chapter structure and processes over time will help you practice the QI frameworks you’re sharing more broadly, too.

Some explanations and models of the various leadership structures are outlined below:

A. Board Structure

The board structure provides a hierarchical organization of your Chapter, in which roles and responsibilities are clearly defined. If your Chapter is interprofessional, you might have one Chapter Leader from each of the different professions, or you might have a single Chapter Leader and multiple vice presidents, each representing a different profession.

This structure is most often helpful if your Chapter is large or growing. You may also wish to create smaller groups within the Chapter to work intensively on specific areas using this structure.
B. Distributed Leadership Model

This model uses a snowflake structure, which enables teams to exercise interdependent leadership, where individuals can work toward goals together, with each team member equally owning the team’s purpose and activity.

The Distributed Leadership Model begins with a collaborative leadership team at the center. Although there may be members contributing to or leading on different pieces of the Chapter’s work, an interdependent leadership team holds a group’s vision and enables interdependent coordination and collective action.

C. Dual Leadership

Within this model, one of the Chapter Leaders is responsible for the internal management of the team, whereas the other is responsible for external contacts. If you choose dual leadership, it is recommended that you have a clear and logical division of tasks. For instance, work could be divided internally/externally by profession or by another sensible separation.

It is important to create an overview of all the responsibilities assigned to Chapter Leaders and intentionally divide them into two sections. Dual leadership is undoubtedly a challenge, especially if your Chapter is large and you don’t know the other Leader very well. One of the common pitfalls of dual leadership is that it’s relatively easy for one person to be the “real” leader and the other to be a sidekick. A clear division of tasks and responsibilities is thus crucial for the success of this structure.

D. Flat Structure

If you started your Chapter recently, or if you have relatively few Chapter members, a flat structure might be more appropriate as you work together to get things off the ground.

In this structure, it is important to manage transitions and handoffs clearly to maintain continuity and role clarity. As
your Chapter grows, come together to decide on your new structure, and confirm and clarify individual roles and responsibilities.

**E. Multi-Campus Leadership**

Some Chapters have representatives from campuses located in different places. This can provide logistical challenges, but also unique opportunities. We recommend that multi-campus Chapters recruit a Chapter Leader from each site, and then consider implementing a board structure to organize resources and events. An example of what this could look like is included below:

![Multi-Campus Leadership Diagram]

**Recruitment**

Recruitment is a major part of running a successful Chapter. Seek a range of health professional students and residents with varied years of graduation. Interprofessional Chapters have the potential to reach a larger audience, an increased likelihood of staying active, and the opportunity to strengthen interprofessional communication and teamwork. Health professions students and residents are notoriously busy, which can often make it difficult to convince new members to join your Chapter. Some strategies and suggestions for you to incorporate in your recruitment efforts are listed below.

**Develop a Chapter Pitch**

Develop a pitch about your Chapter for a convenient and effective way to market the important work that you’re doing. Be prepared to vary your message depending on your audience. Use examples from a person’s specific discipline or profession to personalize your conversation. Here is a template to help design your pitch:

- **Overview:** Who you are, how long you’re going to take, what information you’re going to cover.
- **Introduction:** Describe your Chapter, your mission/goal, how long the Chapter has been on campus, and any other important information about the group. It may help to reference some of IHI or the Open School’s previous work as well.
• **Legitimize your group:** Describe your Chapter’s most recent success or what it’s best known for on campus.

• **Problem:** Describe your Chapter’s current campaign or project.

• **Solution:** What your group is doing about the problem.

• **Involvement:** What students and residents can do to get involved.

• **Other Issues:** Any other projects or campaigns your Chapter works on.

• **Personal Appeal:** Why you got involved. Why do you care about quality improvement? What change do you want to see in health care and/or in your local community?

• **Thanks:** Thank your audience for their time and attention.

Look for the “Made to Stick” materials on the IHI Open School website for additional resources on how to create the perfect Chapter pitch.

**Creating a Recruitment Plan**

Creating a recruitment plan will help your Chapter organize resources and follow through with ideas. Use your entire team to help you recruit by discussing recruitment tactics and assigning responsibilities. Consider the following:

- **Timing** of campus events such as activity fairs or orientations. Be aware of finals schedules or other complications.

- **Resources** such as flyers, bookmarks, and other promotional material to distribute on campus or present during meetings and events.

- **Ownership** of action items. Ask questions like, "Who will print materials?" or "Who is responsible for setting up our table?"

**The IHI Open School can provide you with recruitment materials to pass out on campus or at events.** Submit your request [here](https://openschool.ihi.org) or send us an email at openschool@ihi.org to place your order.

**Recruitment Strategies**

There are generally two methods of recruiting new members: personalized recruitment and mass marketing. Personalized recruitment has a small reach and aims to recruit passionate Chapter members through personal interactions. Mass marketing reaches more people and generally uses less time and resources. Here are some recruitment ideas with this “personalized to mass marketing” spectrum in mind:

- Personally invite a friend, classmate, or colleague to a meeting and follow up with them so that they attend.

- Set new member goals, and challenge Chapter members to bring a new friend or colleague to a meeting or event. Reward whoever brings the most people.

- Host a networking event or an event that will appeal to a large audience, such as a film screening.
• Have Chapter Leaders connect with faculty and organize brief classroom visits or team leaders to come to a weekly meeting. Prepare leaders to speak to benefits of joining the Chapter and hand out materials, invite students to a future event, or show a short video about the IHI Open School. Send Chapter representatives to speak with new students at orientation events.

• Attend a university-wide career or activity fair or, for professional Chapters, stop by new employee or annual trainings for staff. Prepare a clear message and a single action item for individuals interested. Hand out promotional materials and capture their information so that you can follow up with them once the event is over.

• Post recruitment flyers and meeting announcements on bulletin boards or other high-traffic areas. Be creative – some groups even advertise with flyers in bathrooms.

When considering where to recruit, be flexible and consider recruiting in a range of settings:

**Activity Fairs, Career Fairs, & Tabling**
Prepare a clear message and a single action item for interested students and colleagues. Be proactive, visible, and friendly. Hand out promotional materials and other giveaways and capture their information so that you can follow up with them.

**Networking and Training Events**
If your institution or organization hosts orientation trainings or networking events, send Chapter representatives to speak with new students or colleagues who may be interested in your Chapter work.

**Classroom Visits**
Have Chapter Leaders connect with faculty and organize brief classroom visits. Prepare leaders to speak to benefits of joining the Chapter and hand out materials, invite students to a future event, or show a short video about the IHI Open School.

**Self-Designed Events**
Be creative and come up with your own activity to recruit members. For example, you can set up a networking meet & greet where interprofessional peers, faculty members, or colleagues come together for breakfast, a lecture, or a film screening.

**Publicity and Recognition**

In order to continue to grow your Chapter membership, it is important to have strong publicity and to be recognized for your efforts. When holding special events, you should send news releases to campus representatives or departments, appropriate teams across the hospital, or local papers either to announce the event or summarize the event after it has taken place. Reach out to the community relations department at your institution (if there is one) to spread the word about your Chapter events. Many colleges and universities publish newsletters or an online listing of upcoming events. This is an easy way to get publicity.

You should also send this information to the IHI Open School team directly (openschool@ihi.org) for potential inclusion in our newsletter to share it with other IHI Open School Chapters. Every IHI Open School member is also encouraged to submit writings, including event write-ups and summaries, to the IHI Open School to be posted on the IHI Open School website and blog.
Engaging and Utilizing Faculty

Faculty members are strong allies during recruitment. Leverage your relationships with faculty and encourage them to speak about your Chapter in their classrooms or other relevant venues. Well-known faculty can also provide a strong voice when you’re trying to effect change at your school or organization. Here are some ways faculty can get involved in recruitment:

- Email students or colleagues about Chapter events
- Build time into class or organizational trainings for Chapter Leaders to speak
- Offer extra credit for students who join the Chapter or attend events
- Require IHI Open School courses as part of their curriculum or training programs
- Become an advocate for the Chapter among other faculty or departments

Engaging Members

Recruiting, engaging, and maintaining your members are some of the most important aspects of creating a successful Chapter. Each Chapter has an important role to play – for many members, involvement in an IHI Open School Chapter is their first introduction to quality improvement and patient safety.

Setting Membership Goals

Develop a plan to manage your member base by setting membership goals, creating a plan to meet them, and tracking your progress. Some basic goals to track can be a target number of new members per semester or year or percentage of members retained from year to year.

Engage New Members

Once you’ve recruited new members, the next step is to welcome and engage them in your Chapter activities. Keep a sign-in sheet at all events and send a personal welcome to each new member. Survey members periodically to understand their needs and interests. Use the survey results to develop Chapter goals, activities, and events. You can find examples of these on the Open School website.

Communicate with Your Members

Chapters that communicate regularly have higher member retention and participation at meetings and events. Although websites and social networks are a good way to communicate announcements and news, you should not rely on these as your sole method of communication. Many Chapters create newsletters to inform new and existing students and/or residents of upcoming events, recommended courses, relevant articles, opportunities from IHI, and other educational opportunities.
Encourage Ongoing Member Involvement

As your Chapter grows, you may notice that many people initially sign up to join your Chapter, but don’t get involved. Here are a few ideas to help you encourage ongoing involvement:

- **Highlight the Value of Their Involvement**: We’ve heard from many people that earning the IHI Open School [Basic Certificate in Quality and Safety](https://ihi.org), staying involved in a Chapter, and continuing to build skills in quality and safety has impressed current and future employers. It’s also helped them adequately prepare for their careers in health and healthcare and create a supportive learning environment and community for doing so. Make it easy for Chapter members to see how their involvement will give them an edge as a professional or fill a need not currently met in their current role.

- **Incorporate Feedback**: Incorporate assessments or surveys into your events, or on a regular (i.e. quarterly) basis, to get a sense of where Chapter members find the most value in their involvement and where their interests lie. By creating a formal process for feedback, and using what you hear to inform your plans, you will help members feel heard and will set-up your programs and projects for greater long-term success.

- **Leadership Opportunities**: We have found that members are more likely to stay involved if they are given leadership opportunities. Although not everyone can commit to year-long leadership roles within your Chapter, you will find that many want to be involved in running the Chapter on a smaller scale (i.e. providing support for a specific event or helping with PR). Divide responsibilities into smaller jobs and send around a sign-up sheet with opportunities to help at upcoming events during your Chapter meetings. This will encourage your members to help out and become involved on a smaller scale.

Planning and Hosting Events

It’s important for Chapters to run effective meetings and events to engage your community and amplify your impact. Here are some suggested activities or events and advice for preparing for them effectively:

**Suggested Chapter Meeting Activities**

The IHI Open School website is filled with dozens of helpful resources and activities for your Chapter. We have courses, videos, presentations, games, case studies, and tools — and we create new ones all the time. Visit the [Activities](https://ihi.org) section of the Open School website for suggested activities for your next Chapter meeting or event or the [Chapter Toolkit](https://ihi.org) section of our website or additional resources. Here are some ideas you can use during your Chapter meetings or events:

- Review IHI Open School online courses together.
- Use case studies from the IHI Open School website followed by discussion.
- Invite guest speakers (including patients) or individuals with clinical experience to share their knowledge with the Chapter. Consider inviting faculty from other professions.
- Invite friends or loved ones to talk about their personal healthcare experiences.
• Invite policy or advocacy organizations to speak at meetings.
• Join our Global Chapter Network calls, or listen to a recording together, followed by discussion.
• Use a simulation center if available or role play cases.
• Join local awareness campaigns (e.g. National Patient Safety Week activities).
• Contact quality or process improvement personnel or connect with leaders at your local health system or community organizations to link your Chapter with ongoing efforts.

Visit the IHI Open School Blog to get ideas from the larger IHI Open School Chapter Network, or share your successful event ideas or concepts with us at openschool@ihi.org for a chance to be featured.

Preparing for the Event

As you plan your events, consider the following logistical questions and work together as a team to distribute ownership of the tasks.

• **When will the meeting or event be held?** It is important to be conscious of your members’ schedules when choosing the best time for a meeting. Here are some quick tips on scheduling your meeting or event:
  - Schedule around classes or rotations or incorporate into classes. Alternate meeting time of day/day of week every few months to accommodate more schedules.
  - Join meetings with other interprofessional student organizations or relevant teams at your organization.
  - Co-sponsor events with existing groups or campaigns across the organization.
  - Use www.doodle.com to find the best times to meet.

• **What will the agenda look like?** Make your meetings and events valuable for your members by tailoring them to their specific needs. Here is a suggested agenda for your meeting:
  - Welcome and thank attendees for coming. If the group is small enough, you may want to have everyone introduce themselves and their discipline by doing an informal icebreaker.
  - Introduce the Chapter leadership with personal statements — have everyone say a few words about why they became involved in this initiative and why the work is important to them.
  - Run an activity that will engage attendees. Review the Activities section of our website to find learning exercises, ideas, discussions, games, and case studies.
  - Open the meeting to questions and answers.
  - Post the date, time, and location of your next meeting or activity, and ask attendees to fill out the sign-up sheet to join the Chapter.
○ Invite members to socialize after the meeting if possible to discuss ideas for activities and follow-up opportunities.

- **Who will facilitate the meeting/event?** Facilitators keep the meeting discussion on track and within established time limits. Consider changing the facilitator for each meeting. This is also a great way to give your Chapter Leaders and members a chance to build leadership skills and maintain engagement.

- **Where will you host the meeting/event?** Key factors to consider when choosing a location are that it is accessible to the attendees and has the adequate facilities for your activity. If your Chapter consists of multiple disciplines, mix up your meeting locations to accommodate your members.

- **Will you provide food for attendees?** If you have a budget for food, arrange food or snacks for the meeting if possible.

- **What are the best ways to promote the meeting?** The most successful meetings and events are those that have high attendance and participation. Contact more colleagues, students, and/or residents than you think will attend. Invite your Faculty Advisor, dean or assistant dean, hospital managers, and other interested faculty to attend the meeting. Post fliers and ads for your meeting around campus. Utilize department bulletin boards, newsletters, and university or team calendars to increase visibility.

- **Who will take minutes?** It is helpful to take meeting notes to capture attendees’ information, decisions and considerations, and next steps. Notes are also useful to distribute to your members that were unable to attend the meeting or event.

- **Who will follow up with attendees after the meeting?** Follow up by sending an email to attendees within a couple days. Thank them for their time and interest and provide information about upcoming meetings and events. Also provide your contact information and invite them to give feedback on the meeting — what went well, and what needs to be improved for future meetings and activities. Encourage them to invite others to the next meeting.

### Finances and Fundraising

#### Chapter Finances

There are no fees or annual member dues required to start or maintain an IHI Open School Chapter; however, it is the responsibility of the Chapter to acquire any funds necessary to carry out programs and initiatives. We recognize this isn’t always easy. Here are a few suggestions and tips for fundraising:

#### Institutional Support

Ask administration for support and apply for funding through your student life office or make a case to your organization’s leadership team regarding the benefits to their investment in the Chapter. Securing a Faculty Advisor and getting your Chapter officially recognized can help increase your eligibility for funding, meeting space, and connections to health system sponsors.
Fundraising

While not required, fundraising is an excellent way to support Chapter activities and events. This is especially helpful for student Chapters. Review university policies and state laws prior to soliciting donations or hosting fundraising events. Co-hosting events with similar student groups will increase the effort put into your fundraising plan and allow you to build connections and relationships with other organizations for future partnerships. These vary depending on the school, but could include Primary Care Progress, Cost of Care, Academy Health, VA Quality Scholars, and so on. Additionally, some Chapters garner support across multiple departments or schools when their Chapter or event is interprofessional (in attendance and focus).

Here are a few examples of how other Chapters have raised funds:

- Charge Chapter dues per semester or year.
- Charge small entrance fees at events to cover the cost of food, drinks, or a speaker.
- Organize a sale to raise awareness and funds for your Chapter. Consider selling t-shirts, water bottles, refreshments, or even entry into a softball or Frisbee tournament.
- Conduct an auction or raffle with prizes donated from local organizations.
- Solicit donations whenever possible – whether it’s for a speaker, food for an event, or permission to screen a film.
- Challenge another group or organization to a competition like a cook-off or penny-war.

Grants and Scholarships

Grants may be available through your organization or school or may be awarded based on your community and the goals of your work. To search for grants, ask for help at your school’s Office of Student Activities or the relevant department at your organization. We also suggest looking into applying for existing scholarships from local and national organizations, universities, and associations.

The IHI Open School sets aside a small amount of funding twice a year (Fall and Spring semesters) to help support our Chapter Network. Learn more and apply on the Chapter Event Sponsorship page on the IHI Open School website.

Managing Chapter Funds

It is important to draft a Chapter budget early in the year to make sure that your Chapter Leaders have the necessary knowledge to execute fundraising efforts and apply for appropriate funding. Create a template to use to determine your Chapter’s financial needs each year.

Consider selecting a Chapter Leader to act as a treasurer or financial officer dedicated to managing the Chapter budget, setting priorities for spending, recording income and expenses, and identifying fundraising opportunities.
For student Chapters: Campus agency accounts or off-campus bank accounts may be useful in maintaining accurate records of income and expenses and is required at some sites to transfer grant funds. Chapters based in the United States that don’t have university local bank accounts and are interested in administering their funds should apply for an Employee Identification Number (EIN). The EIN is the organizational equivalent of the individual Social Security Number (SSN) or Taxpayer Identification Number (TIN). The IRS provides general information to student groups regarding EINs, which are required for establishing a bank account.

**Tax Exemption and Reporting in the United States**

All Chapters are expected to comply with the regulations of their organization and must also comply with applicable federal and state tax laws. IHI’s tax exempt status does not extend to its Chapter organizations. Filing federal and state returns for an organization and complying with related federal and state tax laws is the responsibility of each Chapter or region.

Chapters should investigate whether they can register with their Secretary of State as a non-profit, with the federal government as a 501(c)(3) group, or as a charitable organization.

**How can we receive tax-deductible donations?**

Some Chapters are asked for their "tax I.D. number" when establishing bank accounts, receiving funds from businesses, or accepting donations. Tax donations to student organizations are not tax deductible for donors, unless they are made to the university through your agency account. For more information, contact your Office of Student Affairs or Finance department.

**Fundraising in the United Kingdom**

The Institute of Fundraising has developed Codes of Fundraising Practice and Code of Conduct to provide a guide to the law and best practice in relation to fundraising activity throughout the United Kingdom. The Bar Pro Bono Unit is a good resource for the rules and regulations about raising money for non-profit activities.

**Sustainability and Succession Planning**

**Sustainability**

Planning for Chapter sustainability is vital to your success as a Chapter and should happen the moment you create your Chapter. There are many things that your Chapter can do to maintain momentum and keep your Chapter in good standing.

- **Regularly recruit members from ALL class levels or points in their career.** Along with growing your Chapter’s size, new members will also bring new energy and ideas. Review our Recruitment section on page 11 for more tips on putting together an interdisciplinary team.
• **Develop standard work.** Keep a record of processes, timelines, contacts, materials, budgets, and lessons learned for events that will repeat to save time and improve year to year. For ease of tracking, we suggest saving these documents to Google Drive or Dropbox and making them accessible to all Chapter Leaders.

• **Create a strong Chapter community.** Make community building a priority by allowing members to share personal stories and get to know one another during meetings and events. To connect with the larger Chapter Network, encourage your members to register on IHI.org to receive emails from the IHI Open School team about relevant opportunities and Chapter news.

• **Update the IHI Open School.** The IHI Open School can guide you, offer advice, and help you form connections with IHI and the IHI Open School Chapter Network. In order to do this, however, it is important that we have a list of your current Chapter Leaders and Faculty Advisors. Please send any leadership team updates through the [Chapter Information Updates form](https://openschool.ihi.org) or directly to openschool@ihi.org.

### Succession Planning

Succession planning should be part of your Chapter’s strategic plan. Your Chapter should be ready for leadership transition to take place before the end of the school year or semester so that your new Chapter Leaders have time for mentoring and coaching before officially taking on new roles. There are a few important things to address during this transition to ensure that your successors are set up for success. Follow these tips to help streamline the process:

• **Collect important information for incoming Chapter Leaders.** Your knowledge of running your Chapter is important to the success of incoming Chapter Leaders. But you need to make sure to collect the information in a way that will be useful to them. Remember to record best practices and information that may be useful to successors. Examples include contacts, Chapter structure documentation, and a resource list. It is important to be able to pass along this potentially overwhelming amount of knowledge in a digestible manner. We recommend filing this information in a binder or folder, or online via Google Drive or Dropbox, so that the incoming leader will have it at hand as they begin the position.

We encourage you to share this Chapter Leader Toolkit and the Chapter Leader Resource section of our website with the incoming leadership team, and to incorporate OS 101: *Introduction to the IHI Open School: Join the Movement to Improve Health & Health Care* and QI 101: *Introduction to Health Care Improvement* as a standard practice for onboarding all new Chapter Leaders.

• **Make a plan.** Leadership transition should occur at the end of the school semester or fiscal year — whenever is the best time for the Chapter — so that your new leaders are prepared when their role officially begins. It’s easy to get distracted by final exams, pressing deadlines, or the day-to-day of your job during the transition period, but stick with it! It will leave you with a stronger, more complete leadership team.

To avoid this problem, you should plan for the leadership selection and transition process in advance. Allow time (at least one month) for current and upcoming Chapter Leaders to overlap, creating an opportunity for training and onboarding before the current leader leaves or graduates. This will allow for a much smoother transition!
• **Identify potential leaders.** Once you make a plan for transitioning your leadership team, you'll need to decide on the process for selecting new leaders that works best for your Chapter. (Will Chapter members apply for positions or will they be nominated? Will the future Chapter Leaders be chosen by the current leaders or by the Chapter? Will candidates be selected by majority or by consensus?) Once you've decided on the process for selecting leaders, begin to start the process of identifying your new leaders. This should happen as early as possible before these members commit to other responsibilities.

• **Update the IHI Open School team.** As previously mentioned, it is important to inform the IHI Open School team of the active contacts for your Chapter to ensure consistent communication between the IHI Open School and your Chapter. After you have finalized your succession planning and leadership transition for the year, email openschool@ihi.org with the contact information for all of the current members of the team as well as the list of those who have graduated or are no longer active in the Chapter.

## Community Network

### Support from the IHI Open School Team

The IHI Open School team is comprised of a small group of full-time staff at the Institute for Healthcare Improvement in Boston, MA, USA. The team manages the growing community and creates new content to help achieve its mission of advancing health and healthcare worldwide.

E-mail openschool@ihi.org to get in touch with the IHI Open School team. The IHI Open School Community team can:

• Help you start your new Chapter.
• Work with you to set your Chapter goals.
• Brainstorm ideas to recruit members, raise funds, and host events.
• Provide useful Chapter resources.
• Connect you with other IHI Open School Chapter Leaders in the community.

### Connect to the Community

The IHI Open School community is a diverse group of students, residents, faculty members, and health professionals. Working with other Chapters in the IHI Open School is a great way to network and engage with other healthcare professionals. Students can connect face-to-face at national or regional events or virtually by email.

**Global Chapter Leader Team:** The Global Chapter Leaders serve as intermediaries between the IHI Open School Team and local Chapters. This group of dedicated former and current Chapter Leaders facilitate the ongoing development of Chapters around the world by coaching them as they build their leadership skills and acumen, their QI competencies, and expand their efforts and impact globally.
To effectively and efficiently work toward this goal, the larger Global Chapter Leader Team is divided into three sub-teams:

- **New Chapter Coaching Team**: This team welcomes, guides, and supports IHI Open School Chapter Leaders to success through the first 12 months as they establish a new Chapter or re-energize an old Chapter after an extended period (more than one year) of stagnation.

  Reach out learn more or receive coaching at: newchaptercoach.ihi.os@gmail.com

- **Global Chapter Coaching Team**: This team develops and maintains connections with established Chapters (i.e. those that have been active for more than one year) to provide ongoing support and coaching to increase their Chapter’s reach through local project work and maintain the sustainability of the Chapter over time.

  Reach out learn more or receive coaching at: globalchaptercoach.ihi.os@gmail.com

- **Chapter Network Coaching Team**: This team builds capacity and opportunities for connectivity and collaboration across Chapters, so that leaders may develop a greater sense of identity, community, and feeling of belonging within the IHI Open School Chapter Network.

  Reach out learn more or receive coaching at: chapternetworkcoach.ihi.os@gmail.com

- **Global Chapter Network Calls**: Throughout the year, the IHI Open School and Global Chapter Leaders host a set of calls to provide an opportunity for new and seasoned Chapter Leaders, Chapter members, Faculty Advisors, or those interested in starting a Chapter to connect and discuss best practices, opportunities, and common challenges they’ve faced in their work. These calls are often topic-based and offer a deep dive into topics like recruitment, curriculum integration, project-based learning, and more.

- **Email Listservs**: To facilitate collaboration with other Chapters, we have created a few ways for you to connect via email listservs. Please note that you must be an active contact in the IHI Open School Chapter database. Contact openschool@ihi.org to make sure that your contact information and Chapter role is updated to ensure that you are a member of the appropriate listserv.

  **Chapter Leader and Faculty Advisor listserv**: The IHI Open School maintains listservs that include all the Chapter Leaders and Faculty Advisors within the Chapter Network. Use the listservs below to connect with the community at large.

    - Chapter Leader listserv: Chapterleaders@ls.ihi.org
    - Faculty Advisor listserv: IHifacultyadvisors@ls.ihi.org

  **Regional listserv**: The IHI Open School has also created email listservs that include Chapter Leaders within specific geographic regions. Contact your regional listserv through the addresses listed below:

    - canada_chapters@ls.ihi.org
    - continentaleurope_chapters@ls.ihi.org
    - latinamerica_chapters@ls.ihi.org
    - midwest_chapters@ls.ihi.org
    - northeast_chapters@ls.ihi.org
- **IHI Open School Chapter Map:** View the map on the Chapter homepage and use it to see a bird’s-eye view of the Open School Chapters in your region. Zoom in to learn more about a specific Chapter and contact a Chapter’s leaders with the click of a button.

### Appendix: Additional Chapter Resources

<table>
<thead>
<tr>
<th>Type</th>
<th>Information</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Chapter Resources</strong></td>
<td>The Chapter Leader Toolkit (what you just read!) is a gold mine of information and tips to help develop Chapter leadership, recruit members, plan events, fund activities, and sustain Chapters over time. It is also available in <strong>Spanish</strong> and <strong>Portuguese</strong>. Download it on from the “Chapter Leader Tools” section of the website.</td>
</tr>
<tr>
<td></td>
<td>Our free overview course, <strong>OS 101: Introduction to the IHI Open School: Join the Movement to Improve Health &amp; Health Care</strong>, is meant to immerse learners in the global community of the IHI Open School. It includes three lessons, which cover tips for starting and growing an Open School Chapter, building a sustainable Chapter, and a general overview of the IHI Open School. This course is a great tool for Chapters to incorporate into their onboarding process for their new leadership teams each year!</td>
</tr>
<tr>
<td><strong>Chapter Event Sponsorship / Funding</strong></td>
<td>Twice a year, IHI provides a small amount of funding to assist Chapters with the important work they’re doing. To be eligible, they must have completed the most recent Chapter Progress Report (unless it is a brand-new Chapter). Additional information and deadlines can be found <a href="#">here</a>.</td>
</tr>
<tr>
<td><strong>Global Chapter Calls</strong></td>
<td>The IHI Open School and Chapter Network Coaches will host a Global Chapter Call to bring together new and seasoned Chapters Leaders, Chapter members, Faculty Advisors around specific topics of interest. It’s a great platform for Chapters to share their work with one another, too. A full archive of the calls, and a list of upcoming calls, is available <a href="#">here</a>.</td>
</tr>
<tr>
<td><strong>Brand Standards</strong></td>
<td>If Chapters want to make their own logo (or use the Open School’s) they can visit this page to learn more about our branding guidelines and access templates to help them create one.</td>
</tr>
<tr>
<td><strong>Updating Chapter Information</strong></td>
<td>Chapters can update their contact information or other details displayed on the Chapter Map through this form.</td>
</tr>
<tr>
<td><strong>Online Courses and Content</strong></td>
<td><strong>General Courses:</strong> The IHI Open School offers over 30 <a href="#">online courses</a> in improvement capability, patient safety, Triple Aim, person-and-family-centered care, leadership, and quality, cost, and value. The courses are free to students, faculty, and residents. For free course access, users must select ‘Student’, ‘Intern or Resident’, or ‘Teacher or Professor’ as their primary role when registering on IHI.org. Registered users can update their profiles at My IHI when logged in.</td>
</tr>
</tbody>
</table>
**Subscriptions:** There are two kinds of subscriptions – professional and academic. Faculty can purchase an academic subscription to track student progress and completion rates. The cost to access these reports for 12 months varies based on the number of participants. Health professionals can purchase a subscription for a modest annual fee to access the online courses and obtain contact hours. More information can be found on our website at [www.IHI.org/LMS](http://www.IHI.org/LMS).

**Project-Based Learning:**

*IHI Open School Quality Improvement Practicum:*

The IHI Open School Quality Improvement Practicum is a course designed to walk students through the process of conducting a quality improvement project. It is not required for the Basic Certificate of Quality & Safety, but rather students receive a Practicum Certificate upon completion. More information is available on the [Practicum webpage](http).

*Leadership and Organizing for Change:*

*Leadership and Organizing for Change,* is designed to teach learners community organizing and leadership practices as they apply them in field-based projects in their local communities. This course is free to a select number of students, residents, and faculty per offering, and offered at a low fee to professionals. It is not required for the Basic Certificate of Quality & Safety. Upon meeting the requirements of the course, learners receive a certificate of completion. More information about the initiative and course is available at [www.ihi.org/lead](http).

**Additional Resources:** We offer a variety of resources, including videos, case studies, improvement stories and games, and publications that Chapters can use as activities, or as part of their larger events.

**Blog:** The Open School uses our blog to share updates and ideas from our team and IHI, our learners, and Chapters around the world. All posts are available [here](http).

**Curriculum Integration:** The Open School offers several resources and examples for faculty and Chapters interested in integrating our courses into their work or curriculum. More information is available on our [Teaching Resources](http) page.
