

SCALE 2.0

SCALE 2.0 (May 2017 - April 2019) expanded the use of *100 Million Healthier Lives* approaches to over 220 communities and up to 500 health care organizations seeking to accelerate their journey to improve population and community health. The initiative brought together two areas critical for sustained community transformation: changes in both community-wide practices and in key anchor institutions (e.g., health care organizations) within those communities.

SCALE 2.0 was generously funded by the [Robert Wood Johnson Foundation](#).

SCALE 2.0 consisted of two related focus areas:

- SCALE Communities, with three components for communities on the journey to population and community wellbeing:
 - Regions of Solutions
 - States of Solutions
 - [Community Health Accelerators Initiative](#) (CHAI)
- SCALE Health & Care for health care organizations on the journey to population and community health.

Regions of Solutions

During SCALE 1.0, through a grant from the Robert Wood Johnson Foundation (RWJF), we partnered with 24 communities to co-design, test, evaluate and formalize a model to improve community health, wellbeing and equity. Having tested our model for developing Communities of Solutions, with renewed support from RWJF, we are launching [Regions of Solutions](#). 18 SCALE

1.0 communities will use the SCALE model to accelerate their own health improvement and equity journeys, while also spreading the use of the SCALE method by forming Regional Networks with 4-6 nearby communities.

These 18 Regional Networks will, in turn, form Multi-Regional Networks:

Regional Cohort 1: Northeast

Regional Cohort 2: Southeast

Regional Cohort 3: Midwest

Regional Cohort 4: Mountain West

Regional Cohort 2: West

States of Solutions
